Glass: Hand Blown Technical Glass

Inspired by the versatility and texture of surface-patterning and the way in which it catches light, the delicate hand-blown crystal cylindrical pieces are cut with clean, clear lines. With components arranged in series and joined by polished champagne-gold finished connections that emit light, Cipher's overall linear form creates a poetic visual rhythm. Regardless of the configuration, there exists an inherent simplicity and earnestness in the effect of light playing off these delicate, perfectly etched glass cylinder
