About Mylar

Mylar is an extraordinarily strong polyester film that was developed in the early 1950s. During the 1960s cellophane gave way steadily to Mylar with its superior strength, heat resistance, and excellent insulating properties. The unique qualities of Mylar allow lighting designers to introduce innovative new lines of light fixtures where light diffuses equally with warm glow.

The **LED Yoko light fixture** is comprised of 47 nickel plated arms in different lengths attached to a metal ring embracing folded Mylar. Dropping from a nickel round ceiling base on thin aircraft wires, Yoko is a beacon of glowing warmth for diverse ceiling heights.

TECHNICAL SPECS

- 10" D Round nickel ceiling plate
- 48" diameter /16"H fixture with 47 nickel plated arms
- G9 dimmable LED Bulbs
- Finish and size are custom
- All of our products are ESA approved
